## TRANSITIONAL SOLUTIONS

## THERAPEUTIC MENTORING

Therapeutic mentoring is designed to provide additional support to youth residing in the community setting. The program focuses on one to one skill building and social support including the development of life skills, anger management and social networking. The majority of time spent with the youth will take place within the community.

## LIFE SKILLS COACHING/ CASEY LIFE SKILLS

Transitional Specialists provide the necessary skills to assist adolescents with re-entry into the community, addressing identified criminogenic needs which include activities to prepare youth for self sufficiency. Specialists work with youth on specific goals to improve behaviors and skills.

## TRANSPORTATION

Transportation services are available to ensure an individual is receiving essential services, based on their individual family service plan, to include various therapies, dental, and medical appointments. Services may also be used to transport a youth to their home school, to ensure academic success, family visitation sessions or from one facility/program to another.

## SURVEILLANCE & GPS MONITORING

360 Transitional Solutions provides surveillance services and GPS Monitoring in collaboration with local Court Service Units, focused on protecting the community while assisting individuals to avoid recidivism.

Services provide a short term alternative that allows an individual to transition or remain in the community under close supervision and restricted movements. GPS is available 24 hour a day, 365 days a year to monitor the youth's movement to ensure safety in the community and manage behaviors. Outreach services ensure safety through face to face monitoring/visits.
